

Dear Customer

It gives us great pleasure to announce that from the 1st of January 2023, Metrohm Australia & New Zealand will become the exclusive distributor for Carbolite Gero, part of the Verder group in Australasia. Our two companies will work seamlessly to provide ongoing support and service for all existing Carbolite Gero customers.

The Carbolite Gero brand is synonymous with high quality, leading heat technology in the design and manufacture of laboratory and industrial ovens and furnaces ranging from 30 °C to 3000 °C and sold globally to over 100 countries. On 1st January 2016 Carbolite (UK) and Carbolite Gero (Germany) joined to become one company under the name of CARBOLITE GERO.

Metrohm is one of the world's most trusted manufacturers of high-precision instruments for chemical analysis. Metrohm Australia & New Zealand has been established since 1999, supplying and servicing the Metrohm portfolio as well as other leading scientific brands. Represented in all major cities, we aim to exceed your expectations when it comes to instrument quality, technical advice and strong after sales support. Metrohm Australia & New Zealand is proud to represent world-leading companies and their advanced technologies.

Along with our partnership announcement, we are delighted to offer an exclusive promotion for new and existing customers. Simply register your Laboratory and/or Industrial Ovens/Furnaces (Carbolite Gero or an alternative brand) [here](#) for a 10% discount voucher off your next purchase or service.

If you have an existing Carbolite Gero Ovens and Furnaces or might be interested in our new technology, please do not hesitate to contact us.
